SUMMARY

Frontend Developer with 3+ years of professional experience building industrial web applications with React, Next.js, and TypeScript. Currently develop Manufacturing Execution System (MES) interfaces, real-time IoT monitoring dashboards, and energy management software for manufacturing clients in Vietnam. Experienced in gathering requirements directly from customers, translating workflows into user interfaces, and deploying software at production plants.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS

Frameworks & Libraries: React, Next.js, Remix, React Native, Redux, TanStack

UI Libraries: Ant Design, Material-UI, Tailwind CSS, Bootstrap

Tools: Git, GitHub, Docker, VS Code

Domain: Manufacturing Execution System (MES), ERP (Odoo), IoT Monitoring, Real-time Dashboards, Telemetry Visualization

Backend & Database (working knowledge): PostgreSQL, MongoDB, JWT, NextAuth

EXPERIENCE

MIND IoT & Smart Factory – Software Engineer (Frontend)

8/2023 – Present

- Develop and optimize real-time monitoring dashboards, telemetry visualization systems, and industrial management interfaces using React, Next.js, and TypeScript.
- Contribute to Manufacturing Execution System (MES) and ERP software for production management.
- Build Energy Management software for large enterprises including Kim Long, SedoVinako, Bong Bach Tuyet, Geru Sports, and Van Voi Minh Hoa.
- Work directly with customers to gather requirements, discuss workflows, and deploy software solutions at manufacturing plants.
- Studied and worked with Odoo ERP as part of manufacturing software solutions.

Softech Corporation – Frontend Intern

3/2020 – 6/2023

- Collaborated with a development team using Git version control.
- Built and completed assigned tasks for the team's final project.
- Gained hands-on experience with Next.js.

PROJECTS

KLMH-EMS – Energy Monitoring System for Kim Long Factory (MIND IoT & Smart Factory)

- Developed the web interface of an energy monitoring and management system for the Kim Long factory, as a member of the MIND IoT & Smart Factory team.
- Built real-time dashboards for monitoring factory energy data.
- Live system: <https://ems.kimlongmotor.vn/>

Library Management Website – Freelance Frontend Developer

Tech: React, TypeScript, Next.js, JWT, PostgreSQL, Docker

- Built a library management system for a church in Saigon, with an admin management portal and a public home page.
- Implemented authentication (sign in / sign up), book and article CRUD, and user management.
- Demo: <https://dev.thuvienttmvsg.com>

THShop – Furniture E-commerce with AI Chatbot (Graduation Thesis)

Tech: Next.js, NextAuth, React, MongoDB, Gemini AI

- Built a furniture-selling website with an AI chatbot (Gemini) for customer support.
- Implemented authentication, product management, and online payment.
- Source code: <https://github.com/duongphihung/thshop-furniture>

EDUCATION

Vietnam-Korea University of Information and Communication Technology

9/2019 – 5/2024

Engineer's Degree in Software Engineering – Da Nang, Vietnam
